This multipurpose cloth can be used dry or with water only to clean everything. It replaces chemical-laden, all-purpose cleaners and paper towels so it's safer for your family and better for the environment!

*BacLock is an antimicrobial agent solely intended to protect and self-clean the cloth by inhibiting growth of odor- and stain-causing bacteria, mold and mildew. BacLock does not protect people from disease-causing organisms.

This product was independently tested for harmful substances according to the strict global criteria of STANDARD 100 by OEKO-TEX®.

THE PROBLEM

Cleaning all surfaces in your home quickly and completely can be challenging and often requires cleaners containing harmful chemicals that can make your family sick. And cleaning with paper towels creates single-use waste.

NORWEX® SOLUTION

Clean more safely, quickly and thoroughly using a super-absorbent Norwex EnviroCloth and water only! Protects your family's health while reducing landfill waste and chemicals in your home.

WHY IT'S BETTER

- **Densely woven, superfine Norwex Microfiber physically removes up to 99% of bacteria from a surface with water alone when following proper care and use instructions.**
- BacLock®, our exclusive micro silver agent, protects the cloth by inhibiting odor in the cloth, which means it's ready to use again and again.
- Made with fiber 1/200th the thickness of a human hair and with a maximum length of more than 10 million feet (3 million meters) for more effective cleaning power.
- Traps dust and grime in the cloth and leaves surfaces cleaner, so you won't have to clean as often.
- Used with water, reduces 53 chemicals typically used in the home, based on a comparison of Norwex to 18 retail brand cleaning products, 2020.
- STANDARD 100 by OEKO-TEX® certified, this product and its components have been tested against a list of over 350 harmful substances and passed, enabling you to make responsible decisions for you and your family.

WHAT YOUR CUSTOMERS WILL LOVE

- Can be used everywhere—throughout the house, in the garage, patio, boat, camper and more!
- Saves time and money by using only water; no need for harmful chemicals.
- Eliminates the need for paper towels, creating less waste and less paper dust in the home.
- Eliminates residual "chemical muck" left behind by typical cotton cloths and harsh cleaning products.
- Available in several colors, allowing you to color-code for different purposes or rooms.
- Denim, forest, teal and graphite with amethyst trim color options are each made from 70% recycled microfiber yarn—the equivalent of two 500 ml recycled plastic bottles per cloth.

HOW TO USE

- **Use dry to dust**—the static electricity lifts the smallest particles of dust and dirt up into the cloth and prevents them from resettling on surfaces.
- **Use damp for general cleaning and heavily soiled areas**—it picks up almost everything using only water.
- Use on any surface, including bathrooms (taps, sinks, tubs, counters, toilets and more), walls, windows, floors, vehicles, toys, tools, kitchen appliances and surfaces, outdoor furniture and much more.
- Can be folded and refolded to create multiple surfaces for nonstop cleaning.
- When using on easily scratched surfaces such as brushed stainless steel, first test Norwex Microfiber on an inconspicuous spot. *Not for use on anti-glare surfaces.*

(continued on next page)

All Norwex Microfiber products carry a two-year warranty. Please visit www.norwex.com/product-guarantee for complete details.

CARING FOR MICROFIBER

Wash dirty microfiber with a Norwex laundry detergent and avoid bleach, fabric softeners and dryer sheets. For complete instructions, go to your *Consultant Office > Resources > Product Information > Product Instructions > Microfiber Care.*

DEMO TIPS

- Spread some butter on a mirror at your party. Place wet, folded EnviroCloth flat against surface to demonstrate how well it works to remove the butter in just a few swipes, without streaking. Polish with a dry Window Cloth for a streak-free shine.
- Sprinkle some pepper on your Host's kitchen counter, then use a damp EnviroCloth to pick it all up in just one swipe!

DID YOU KNOW

- The average household spends \$600 – \$800 a year on cleaning products and supplies.
- 3,000 tons of paper towel waste are created every single day—that accounts for 51,000 trees and 60 million gallons of water, per day!

COMPLEMENTARY PRODUCTS
